Dear Goerge, 5/26/91

The copying is ongoing and I'll mail what is copied with this. Plus what I had had set aside for copying. One record may not be enclosed because I will have more than the one page that mentions you copied. I spot-checked it when I looked at it and it is an FBI NO compilation os things said by Garrison 's office. It is more than 100 pp. and may be too much for this slow machine to get to today. Some of the items may be of interest on Garrison's wildness, etc.

I'd made some notes on scratch paper for talking to you about but it was impossible to use the phone this morning and I don't want to interrupt your work so I enclose it.

Something unusual and a bit frightened but apparently of no significance happened. About a quarter of an hour after the blood was drawn for the regular testing and when I'd returned to my car I started bleeding copiously. With pressure it stopped and I washed up at the lab. The test results indicated a need for more anticoagulent so I phoned the doctor, gave the information, and when waiting for what the doctor said got disconnected. His damned phoned stayed busy for an hour and a quarter so I drove in. He ordered that the clotting test be repeated and he had other tests made and there is nothing abnormal. I have the results now. But if anyone ever asks you why I avoid out-of-town driving, this is why: a simple bump that would be inconsequential xxx to others can kill me.

Except maybe for the long one I'm making copies for myself so if you have any questions I'll be able to answer them by phone.

The student helper is making the copies. I'll read them after she makes them. She is to return tomorrow.If they are not all done today, she'll finish tomorrow.

Attached to 62-109060-5113, in Section 127, is a long legal-size transcript of the statement taken from Russo when under trith serium. I have not copied it, but if you want it will.
